

Overview

Headquartered in San Francisco, URS Corporation is a leading provider of engineering, construction and technical services for public agencies and private sector companies around the world. The company has the capabilities to support every stage of the project lifecycle, from inception through start-up and operation to decommissioning and closure.

URS operates in more than 40 countries through a network of offices in the Americas, the UK & Ireland, Asia Pacific, Continental Europe, South Asia and the Middle East.

Fact Sheet

Key facts

- In January 2012 URS Scott Wilson in the UK & Ireland, Continental Europe and the Middle East became URS as part of a global programme to have a single and consistent brand across the company's operations. In some regions, such as India and China, the brand's transition will be phased in recognition of our current brand exposure in each area.
- Total revenue in 2010 was \$9.18 billion.
- URS has approximately 48,000 employees in more than 40 countries, with a major presence in the UK & Ireland, Continental Europe, the Middle East, China, India, Australia, New Zealand and the Americas.
- We offer a professional staff of engineers, architects, planners, scientists, information management specialists, programme and construction managers, and construction contractors.
- A key attribute of URS is its global reach supported by the transportable skills of its indigenous staff.
- While URS has been offering bespoke sustainability services to our clients for more than 20 years, we have recently embarked on a global initiative to mainstream sustainability throughout all of our services. Implementation of this strategy is led by a senior Sustainability Committee dedicated to supporting new and evolving capabilities in climate change adaptation and mitigation, resource scarcity and related social and environmental sustainable development issues.
- URS has an unwavering commitment to performing work safely, ethically and to the highest quality standards.

- The business is focused on four key market sectors: infrastructure, government, power and industrial & commercial.
- URS has been at the forefront of efforts to expand and modernise critical **infrastructure** for more than a century. From programme management, planning, design and engineering through construction, construction management, and operations and maintenance, we have the resources and capabilities to provide full lifecycle services for infrastructure projects anywhere in the world.
- URS serves the departments and agencies of several national **governments**, including defence agencies in the UK and Australia, the UK Nuclear Decommissioning Authority, and national environmental and transport agencies worldwide. We also provide engineering services and critical technical support to many United States federal agencies, such as the Department of Defense, Homeland Security and Energy, NASA and the U.S. Environmental Protection Agency.
- URS designs, builds, operates and maintains fossil fuel, nuclear, hydroelectric and alternative and renewable **power** generation facilities. We are focused on delivering cost-effective and environmentally sound services, solutions and operating systems. We are also a leading party in the management and operation of the Sellafield site, one of the most complex nuclear sites in the world and the largest decommissioning project in the UK.
- URS helps multinational corporations and other private sector clients meet their engineering, construction, operational and environmental challenges. We provide services for every phase of the project lifecycle – from front-end studies, engineering and process design, procurement and construction to facilities management and maintenance, and decommissioning and closure. The company maintains long-term, preferred-provider relationships, Master Service Agreements and strategic alliances with the world's leading **industrial and commercial** companies.

Market sectors

Infrastructure

- Aviation
- Facilities
- Ports & Maritime
